## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-5, 12-14 and 18-19, drawn to a method for managing a schedule for a project and a computer-readable medium carrying one or more sequences of instructions for generating a schedule for a project, and a computer system classified in class 705, subclass 9.
  - II. Claims 6-11, 15, and 20-22, drawn to a method for managing project files over a network and a computer-readable medium carrying one or more sequences of instructions for managing project files over a network, and a computer system classified in class 707, subclass 104.1.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as creation and managing of a project files associating with a project and store the project files and draft in a database. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3623

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
